                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Berlin, K., Gut, I.G. and Lehrach, H.
Method for identifying nucleic acids by means of matrix-assisted
laser desorption/ionisation mass spectrometry
Patent: WO 9929998-A 12 17-JUN-1999;
MAX PLANCK GESELLSCHAFT (DE); BERLIN KURT (DE); GUT IVO GLYNNE
(DE); LEHRACH HANS (DE)
Location/Qualifiers
Fusion protein comprising an eIF-4E domain and an eIF-4G domain joined by a linker domain. Patent: US 6369199-A 6 09-APR-2002; Location/Qualifiers
                                                                                                                                                        Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Gaps
